Monday to Friday: 9am – 5pm

Call for proposals for the Canadian Research Data Centre Network (CRDCN) National Conference 2019:

Advancing the Health and Well-Being of Canadians

The CRDCN 2019 Conference will be held in **Halifax on Oct. 24 & 25**, and the call for proposals is now open! We invite proposals for regular or poster presentations on topics relevant to health and well-being, using survey and administrative data, but non-thematic proposals will also be considered. Data-related and methodological papers are also welcome. We encourage you to include a discussion about the policy implications of your results. We look forward to receiving your submissions by **June 14**. Details and submissions at: <https://crdcn.org/crdcn-2019-national-conference>

New Datasets at the RDC

Survey on Early Learning and Child Care Arrangements (SELCCA) – 2019

Statistics Canada is gathering information from families who use child care as well as those who do not. The survey, which addresses child care in Canada for children younger than 6 years old, asks about the different types of early learning and child care arrangements that families use, difficulties some families may face when looking for care, as well as reasons for not using child care.

Canadian Income Survey (CIS) - 2017

The Canadian Income Survey (CIS) is a cross-sectional survey developed to provide a portrait of the income and income sources of Canadians, with their individual and household characteristics.

There are many datasets available through the RDC. Researchers interested in accessing these datasets are encouraged to submit proposals. Available datasets can be viewed here: <http://www.statcan.gc.ca/eng/rdc/data>.

RDC tip of the month: Meeting with supervisors

Instead of placing a vetting request for results in order to show them to a supervisor, we recommend that students meet with their supervisors inside the RDC whenever possible.
